About

As a self-taught full-stack software developer, I bring a unique blend of creativity and technical expertise. Originating from the challenge of establishing a website for my social media marketing agency and marketing my music productions, my journey has evolved into a passion for crafting responsive, intuitive web applications.

I specialize in delivering fully functional, visually appealing solutions, from custom landing pages to e-commerce platforms. Thriving in dynamic, collaborative environments, I am a self-motivated learner committed to continuous skill enhancement.

I offer a results-driven approach, making me an ideal fit for either collaborative team projects or freelance opportunities. Let's connect and explore how I can contribute to your software development needs.

Skills

- HTML | CSS | JavaScript | Bootstrap | ES6 | EJS | MongoDB | NoSQL | PostgreSQL | Node | Express | React | Tailwind | Bash | Linux
- OOP | CRUD | MVC | Web Development | Software Engineer | Frontend | Full-Stack | Devops | Agile | Scrum | Kanban | Git | API

Experience

- Software Development Internship (ScholarshipAuditions.com): June 2023 - Aug 2023
- Web Development Freelance: October 2023 - Present

Projects

Tripz: Rent a Car

- Created a user-friendly platform that provides a seamless car rental experience for customers, ensuring a positive rental experience.
- Developed a modern and responsive rental car website using **JavaScript** to enhance user experience and provide easy navigation.
- Incorporated a FAQ accordion to simplify the process of finding answers to common questions for potential customers.

Director Letters

- Developed a robust educational correspondence platform using **Node.js** and **MongoDB**.
- Collaborated with stakeholders to identify and integrate key features, resulting in a user-friendly interface tailored to the unique needs of school administrators and providing a comprehensive repository of different types of letters.
- Improved efficiency for school administrators by providing a centralized platform for diverse letter templates, reducing time spent on correspondence tasks by 100%.
- Received positive feedback from users for the platform's intuitive design and enhanced search capabilities.

SuiteTooth: Digital Marketing Website

- Built a dynamic platform using **EJS** and **Node.js** to provide a responsive interface for users.
- Successfully incorporated a sales funnel to guide users towards a desired action or conversion, resulting in improved user engagement.
- Designed the platform based on popular social media management platform Hootsuite.com, resulting in a visually appealing and user-friendly interface that streamlines the user experience.
- Utilized modern design principles to create an engaging platform, optimizing customer satisfaction rates and overall user experience.
- Improved website traffic and user engagement by implementing best practices for user interface design and development.

Storybooks

- Developed a website with **CRUD** functionality for both users and stories, allowing users to create, read, update, and delete content easily.
- Implemented user authentication and authorization features to ensure the security of user data and prevent unauthorized access.
- Created a public and private story feature that allows users to control who can view their content, resulting in improved privacy.
- Created unique profile pages for each user, in turn allowing others to view them, resulting in improved user engagement and retention.
- Utilized **Handlebars** for rendering page views, resulting in improved website performance and faster loading times.
- Developed a **MongoDB** database to store all user and story data, resulting in improved data management and scalability.

Gericht: Fine Dining Landing Page

- Developed a visually appealing fine restaurant website using **React** components, increasing user engagement and customer attraction.
- Incorporated high-quality images of the restaurants' food, providing users with an immersive and engaging experience that showcases the upscale atmosphere and dining experience.
- Utilized modern design principles to create an excellent platform template for promoting fine dining and attracting potential customers.

Education

Bachelor of Science

Middle Tennessee State University

Murfreesboro, TN

2015 -2020
